

Resources for Teachers

We are committed to delivering high quality Careers, Education, Information and Guidance to help support and provide students with a range of options throughout their time with us. Our aim is for students well informed and go on to achieve their potential with the full understanding of the pathways and industry information that are available to them.

At Royal Wootton Bassett we would like all subjects to do the following:

- Displays providing links to careers and skills within various industries.
- Take part in whole school careers days, allowing students the opportunity to see what they have learnt in the classroom can be applied in industry.
- Ensure **all** learners needs and interests are considered including those moving onto other pathways such as apprenticeships or technical qualifications.
- Develop links with businesses and organisations.
- Integrate careers links within lessons to expand knowledge and skills in preparation for the 'World of Work'.
